

[Safety] [Garmin 7" Truck Satnav]

Garmin 7" Truck Satnav

Overview

The Garmin 7" Satnav includes premium mapping, live traffic updates, voice-controlled navigation, Bluetooth hands-free calling, advanced connectivity features, and more – with a powered magnetic mount for secure attachment and easy removal of the device from your vehicle. An optional lockable RAM Cradle (with a mount included) is also available for additional security.

Enter your vehicle's profile characteristics (such as size, load, and weight) for personalised routing, with alerts for bridge heights, weight limits, sharp curves, and steep gradients.

This high-definition touchscreen Satnav, with pinch-to-zoom functionality, offers a range of alerts and features to help your truck drivers safely and efficiently reach their destination.

Preloaded Street Maps	Yes
Included Map Updates	Yes
Data Cards	1 memory card slot
Internal Storage	16GB
Storage/Power Capacity	Compatible with Windows® 7 or newer, and Mac® OS X 10.11 or later

Navigation and Routing

Detailed mapping of Europe is pre-installed onto your device, offering you key information on truck-related restrictions* (such as bridge heights and weight limits) that may impact your journey. Based upon your vehicle's profile characteristics (such as dimensions and weight), the device calculates the best route to avoid restricted or impassable areas. The device also considers live traffic data, accessible for free via the Garmin Smartphone Link (available on Android and IOS), allowing you to avoid traffic delays and find time-saving detours.

- Plan your breaks with pinpointed service stations, so that you can easily incorporate food, fuel, and restroom stops into your journey.
- Use the built-in Wi-Fi to keep your maps and Satnav software up to date, without needing to plug your device into a computer.
- Active lane guidance provides voice prompts and brightly coloured arrows on the display to indicate the proper lane needed for your next turn or exit.
- The navigation screen displays your current speed, the speed limit, the road or street you're driving on, and your expected arrival time at your destination.
- Create multiple-stop routes – easily add points to your route by simply tapping on the screen.
- Plan out trips in advance and save them for the future.

**For most major roads and motorways.*

More Features

- Voice-activated navigation allows you to control your device using simple voice commands.
- The Satnav is equipped with powerful speakers that deliver clear spoken turn-by-turn directions – that you can hear loud even over road noise.
- Sync a Bluetooth-enabled smartphone or tablet for wireless, hands-free calling through the Satnav's integrated microphone and speaker.
- Receive customisable smart notifications for calls, texts, and app alerts from your connected smartphone or tablet, which appear right on your navigation display.
- Fleet Operators can easily track drivers and send communications (such as a text message containing a delivery address) through the preloaded simple truck monitoring solution. Your driver can select the address from within the text message and seamlessly route to the destination.
